

Figure 1 is a line plot titled "8 Rosenbrock". The x-axis is labeled "log10 of (# evaluations)" and ranges from 0 to 8. The y-axis is labeled "targets in 100 instances" and ranges from 0 to 100. A vertical black line is drawn at x=7. Two data series are plotted: v2.1 (cyan line with 'x' markers) and v3.0 (green line with triangle markers). v2.1 starts at (0, 0), rises to (1, 10), and then jumps to (2, 100). v3.0 starts at (0, 0), rises to (1, 10), and then jumps to (2, 100). A legend in the bottom right corner identifies the series: v2.1 (cyan line with 'x' markers) and v3.0 (green line with triangle markers).
